William James College Telemental Health Conference

Telemental Health: Expanding the Digital Frontier

Web, mobile and sensor technologies offer opportunities to expand your clinical practice and interact with a wide variety of clients. Learn about advances in digital behavioral health and implications for clinical care and population health. Gain knowledge of up-and-coming digital interventions for behavioral health practitioners, study the reimbursement, licensure and ethics involved in Telemental Health, and learn how to incorporate effective digital intervention technology into your own practice.
