How to Get Started in Telemental Health

Jay Ostrowski, MA, LPC-S, NCC, DCC, ACS, CTCP
CEO, Behavioral Health Innovation

Telemental Health Provider
Learning Objectives

1. Identify three best practices telemental health
2. Know the minimum requirements for starting a telemental health program
3. Learn the key identifiers of HIPAA-secure technology
4. Know common pitfalls of a new telemental health program
Disclosures & Disclaimers

• Affiliated with several organizations.
  • Behavioral Health Innovation
  • Adaptive Telehealth
  • Center for Credentialing & Education
  • Mid-Atlantic Telehealth Resource Center
  • telementalhealthcomparisons.com
• Not representing any organization.
• Not a lawyer.
How to Get Started In Telemental Health

- Industry Overview
- Service Design & Creation
- Best Practices
- Choosing Technology
- Minimum Requirements to Start
- Common Pitfalls
Current Mental Health System

~ Is rather depressing

• Too costly
• Ineffective
• High relapse rates
• Difficult to access
• Not customer friendly
• Most clients do not return for a second visit
Limited Access to Care

We will not have enough Mental Health Providers for the foreseeable future.
Effectiveness
Research on Telemental Health

- Positive Outcomes
- High Patient Satisfaction
- Moderate to High Clinical Satisfaction

Meta-analysis of 92 studies of online therapy
*Journal of Technology in Human Services, Vol. 26, No. 2*

Meta-analysis of 148 peer-reviewed studies on the use of video therapy online
*Clinical Psychology: Science and Practice, Vol. 16, No. 3*
What does the research say about telemental health?

**Same Efficacy**
- Literature supports efficacy of nearly all TMH/TBH services\(^1\)

**Same Methods**
- TMH uses same theoretical methods & techniques\(^2\)

**Same Services**
- All in-person mental health services can be delivered via video\(^3\)

**Same Patients**
- No Contra-indications
How to Get Started

- Service Design & Creation
- Best Practices
- Choosing Technology
- Minimum Requirements to Start
- Common Pitfalls
How to Start?

what people think it looks like

what it really looks like
“Everyone’s gotta plan ‘till they get punched in the face.”

~ Mike Tyson
Service Design & Creation

What services are missing?
What are the Market needs?
Incremental adoption?

Additional Considerations

Access to care, access to specialties
Increase efficiencies
Reduce costs
Provider retention
Expand market reach
Telemental Health Settings

- Client Home
- Clinic-to-Clinic
- Residential
- Schools
- Corporations
- Prisons
Types of Engagements

1. Text and email
2. cCBT - Computerized Cognitive Behavioral Health Therapy
3. mHealth - Apps
4. Community forums - provider led, community led
5. Video - individual, group - provider led
6. Virtual Reality Exposure Therapy (VRET)

- Client led self-help
- Provider led
- Community led
- Provider prescribed
- Combinations
Offer A Spectrum of Solutions

Video

cCBT

Text Based

Design
Video Group Treatment & Aftercare

Drug and Alcohol Treatment
Relapse Prevention
Settings

Clinic-to-clinic

Clinic-to-X
   School/Prisons/Crop

Clinic to client home
   (DTC = Direct-to-Consumer)

Clinician home to client home
   (DTC = Direct-to-Consumer)
Professional Guidelines

- **AAMFT** - American Association of Marriage and Family Therapists
  - Code of Ethics
- **ACA** - American Counseling Association
  - Code of Ethics
- **AMA** - American Medical Association
  - Resolution 317 in favor of quality telemedicine policies
- **APA** - American Psychological Association
  - Guidelines for Ethical Practice of Telepsychology
- **ATA** - American Telemedicine Association
  - Guidelines for Video Telemental Health
- **NASW** - Standards for Technology and Social Work Practice
- **NBCC** - National Board for Certified Counselors
  - Code of Ethics for Distance Services
## Best Practices in TMH

</table>
Best Practices: Technology

Consider
- Security
- Workflows
- Scheduling
- “Paperwork”
- Referrals
- Supervision
- Mobility
- Growth
True of False?

No Technology is HIPAA Compliant.
HIPAA-Secure Technology

https://www.telementalhealthcomparisons.com

Examples of technology made for Telehealth

adaptivetelehealth.com

wecounsel.com

securevideo.com
Choosing Technology (Part 1)

Key Factors

• Setting where services take pace
• Interface with existing technology?
• Additional equipment required
• Workflows that enable services
• Budget
Choosing Technology (Part 2)

Technical Requirements

- HIPAA compliance or security
- Interoperable - EHRs & other TMH Apps
- Multi-modal - Video, text, cCBT
- Mobile enabled
- Internet bandwidth requirements
- Technical support needed
HIPAA-Secure Technology

Vendors should be able to tell you:
• What ePHI is accessible to their staff
• How they protect ePHI
• Describe Administrative,
• technical and physical controls
Minimum Start-Up Requirements

- Identify limited scope
- Financial plan
- Policies and procedures
- Workflows
- Time budget
- Leadership & staff buy-in
- HIPPA-secure software
- Trained providers
- Outcome measurement

This is a generalization. Please ensure compliance with organizational, professional and state law, ethics and guidelines.
Workflows

- HIPAA Secure Communication
- Compliance workflows
- Referral Workflows
- On-boarding Clients
- Scheduling
- Clinical Documentation
- Billing
- Evaluation
- Supervision
Common Pitfalls

- Analysis paralysis
- Poor/no systems
- Too frugal
- Too expensive
- Too much change at once
- Try to please everyone
